the 2002 Farm Bill is important and minimal change should be made.
However, there is something wrong with sending a 50¢ lb of cotton
to other countries half way around the world and then bring that
same 50¢ lb of cotton back to our stores to be sold for \$6 as a shirt.
Producing cotton below the cost of production exports not only our cotton
but our soil fertility, manpower and most of all our water.
Our denim mill used to make money but, since NAFTA we have not made anything.
